

Public Announcement November 9, 2015

A Learning Focused Leadership Team Meeting, attended by principals, directors, chief officers, and the superintendent, was held on Wednesday, September 9, 2015 at the School Board Office. The goal of these important monthly meetings is ultimately to build leadership capacity among and across all areas and departments, improve professional relationships, build collegiality, and reconfigure central office work practices and relationships with the schools to better support district wide improvement of teaching and learning. It is imperative to align practices and processes aimed at leveraging, aligning and optimizing instructional strategies so that we may improve teaching and learning.

Staff members and guest speakers from the Dan River Basin Association and Chalk Talk presented fun ways to engage students, improve learning, and promote good news in the division. It was also a time of deep listening and productive dialogue as participants, with a spirit of learning and relationship building, collaborated.

The meeting could not have been possible without the active participation of these individuals. It is also with gratitude that we recognize Wilkins & Co. Realtors, Inc. for generously sponsoring the meeting. It is through the commitment, generosity and support of individuals and businesses that we are able to meet our mission of providing a world class education to students while simultaneously bettering our community.
